

# USED VEHICLES

**This warranty for used vehicles** is offered to you free of charge, if your vehicle is less than three (3) years old and has less than 60,000 kilometers and if it meets the other qualifying criteria provided that the vehicle receives a complete treatment in a *Metropolitan Rust Proofing Inc.* or *Antirouille Métropolitain inc.* center, each year without exception, within twelve months of the date of the previous treatment. This warranty protects the vehicle against rust appearing from the inside towards the outside of the vehicle. Areas treated and covered by this warranty are all the body panels located below the window frames, the floor, rocker panels and bumpers.

This warranty is a repair-type warranty. Only the perforated area will be repaired, meaning that if a door, a fender panel or any other area covered by the treatment becomes perforated by rust appearing from the inside towards the outside of the vehicle, only such door, fender panel or other area will be repaired and repainted at our costs. All past treatment invoices will be required as proof in case of claim. The customer must obtain a written authorization from *Metropolitan Rust Proofing Inc.* or *Antirouille Métropolitain inc.* before proceeding with any repairs covered by this warranty.

### **Transferability of the warranty:**

This lifetime warranty is personal. If you sell your vehicle, this warranty is not transferable to any subsequent owner.

### **Exclusions:**

This warranty does not apply to rust penetrating from the exterior towards the interior of the car body, which means that the opposite side of the side receiving the coating is not covered by this warranty. This warranty does not extend to areas damaged by a collision or other accidents, scratches or acts of vandalism, moldings or spoilers. The gas tank, exhaust system, fuel line, brake lines and paint on the vehicle are not covered by this warranty.
